**UPDATED DOCUMENTATION:**

Dear customer, we thank you for your attention and we remind you that you need to check that the following document is:

- Updated
- Related to the product you own

To obtain the most recently updated document, note the "document code" that appears at the top right-hand corner of each page of this document.

With this "Document Code" go to web page [www.adfweb.com/download/](http://www.adfweb.com/download/) and search for the corresponding code on the page. Click on the proper "Document Code" and download the updates.

To obtain the updated documentation for the product that you own, note the "Document Code" (Abbreviated written "Doc. Code" on the label on the product) and download the updated from our web site [www.adfweb.com/download/](http://www.adfweb.com/download/)

**REVISION LIST:**

Revision	Date	Author	Chapter	Description
1.001	07/06/2005	Dp	All	
1.002	22/06/2007	Av	All	Revision
1.003	26/06/2007	Av	All	Revision
2.000	09/10/2008	Fl	All	New document format

**WARNING:**

ADFweb.com reserves the right to change information in this manual about our product without warning.

ADFweb.com is not responsible for any error this manual may contain.

**TRADEMARKS:**

All trademarks mentioned in this document belong to their respective owners.

## INTRODUCTION:

The product is a software component presented as a library that is available in two version: DLL and ActiveX. Both have available functions for the following: the organization of the library, initialization, writing, reading and closing.

The library can be used with any system /Programming language such as Visual C, Visual Basic, Delphi, C Builder, Basic Script and HTML.

Applications are provided with the library.

The product functions with various ADFweb products that use the modbus as a communication system: the serial converter 232/485 (code order: HD67118) and the Configurable Modbus to CANopen Gateway (code order: HD67002).

## DRIVER CHARACTERISTICS:

- ModBUS functions implemented:
  - Read Holding Registers
  - Write Single Register
  - Write Multiple Register

## SOFTWARE COMPATIBILITY:

- Windows 9x, Windows 2000 , Windows XP

## FILE CONTENTS: SWD-MRTUv1.ZIP:

Contains the following folders and files:

- Readme.txt
- ADF00007-0.PDF (Manual SWD-MRTU)
- ADF00006-0.PDF (Manual HD67118)
- Folder ADF\_ModbusDLL
  - ADF\_Modbus.dll
  - Folder Example Delphi
  - Folder Example Visual Script
  -

The number of the software version and the "document code" of the related documentations is contained in the file readme.txt .

## THE MODBUS FUNCTIONS EXPORTED FROM THE LIBRARIES

### Modbusinitialize

PARAMETERS:

Name	Description	Data type	Value
PortN	Number of the port	Unsigned char	0-255 0 = COM1 1 = COM2
Baud rate	Communication speed	Unsigned long	300, 600, 1200, 2400, 4800, 9600, 19200, 38400, 57600, 115200
Parity	Control of parity	Unsigned char	0 = none 1 = odd 2 = even
Data bits	Data size in bit	Unsigned char	4, 5, 6, 7, 8
Stop bits		Unsigned char	0 = 1 stop bit 1 = 1.5 stop bit 2 = 2 stop bits
Timeout	Timeout in milliseconds (used in the operations of reading and writing data)	Unsigned int	

RETURN VALUE:

The function returns an "unsigned char" that can take on the following values:

- 0 if there is an error.
- 1 if the operation is completed correctly
- 2 Dll just initialized
- 3 Dll busy
- 5 Unable to access to the Com port
- 7 Not correct parameter

## ModbusRead

### PARAMETERS:

Name	Description	Data type	Value
Num slave	Device address	Unsigned char	1 - 247
tipo	Type of data to read	Unsigned char	3 - holding register
address	Data address	Unsigned int	1 - 65535
npoint	Number of variables	Unsigned int	Register 1-99
data	Memory pointer	Unsigned int *	Data pointer

### RETURN VALUE:

The function returns an "unsigned char" that can take on the following values:

- 0 Error in read
- 1 if the operation is completed correctly
- 2 Dll not initialized
- 3 Dll busy

## ModbusWrite

### PARAMETERS:

Name	Description	Data type	Value
Num slave	Device address	Unsigned char	1 - 247
tipo	Type of data to write	Unsigned char	3 - holding register
address	Data Address	Unsigned int	1 - 65535
npoint	Number of variables	Unsigned int	Reg 1-99
data	Memory pointer	Unsigned int *	Data pointer

### RETURN VALUE:

The function returns an "unsigned char" that can take on the following values:

- 0 Error in write
- 1 if the operation is completed correctly
- 2 Dll not initialized
- 3 Dll busy

## Modbusdeinitialize

PARAMETERS: none

RETURN VALUE:

The function returns an "unsigned char" that can take on the following values:

- 1 if the operation is completed correctly
- 0 if there is an error.

## DIMENSION OF DATA

**unsigned char** is a 8bit data

**unsigned int** is a 16bit data

**unsigned long** is a 32bit data

## ACCESSORIES:

Order Code: **HD67002** - Gateway CANopen / Modbus Slave RTU

Order Code: **HD67118** - Adapter RS232 / RS485

**WARRANTIES AND TECHNICAL SUPPORT:**

For fast and easy technical support for your ADFweb.com SRL products, consult our internet support at [www.adfweb.com](http://www.adfweb.com). Otherwise contact us at the address [support@adfweb.com](mailto:support@adfweb.com)

**RETURN POLICY:**

If while using your product you have any problem and you wish to exchange or repair it, please do the following:

- 1) Obtain a Product Return Number (PRN) from our internet support at [www.adfweb.com](http://www.adfweb.com). Together with the request, you need to provide detailed information about the problem.
- 2) Send the product to the address provided with the PRN, having prepaid the shipping costs (shipment costs billed to us will not be accepted).

If the product is within the warranty of twelve months, it will be repaired or exchanged and returned within three weeks. If the product is no longer under warranty, you will receive a repair estimate.
